INTRODUCTION

DoctorS Nonprofit Consulting (DNC) was hired by Art & Creativity for Healing Inc. (ACFH) in May of 2020 to provide an outcome evaluation for the 10-year program data for participants in ACFH workshops. ACFH has facilitated these “Art4Healing®” workshop programs at more than 40 hospitals, treatment centers, military bases, schools and non-profit agencies throughout Southern California. Since 2000, more than 80,000 children and adults have participated in these classes and workshops.

METHOD

For this project, ACFH staff entered the data from their surveys into an online computer program. DNC then downloaded data spreadsheets in both excel and SPSS formats. DNC reviewed the data and addressed any data entry concerns with ACFH staff. SPSS statistical software was used for the evaluation process which was conducted by consultants in July 2020 and August 2020. For this project, the program’s data collection procedures were reviewed. Initially, a series of frequency tables were run to establish basic program statistics. Following this, a series of correlations and one-way analysis of variance (ANOVA) tests were computed on the data. A full statistical report of the test outcomes is included in appendix A. Correlations are useful in determining how closely one variable relates to another variable. ANOVAs are useful for comparing differences between groups.

KEY FINDINGS

Overall, it is significant to say that 96% of the 2009-2020 participants reported that they were satisfied with their workshop.

Since 2009, 81.5% of participants strongly agreed that the workshop was great. Seventy-eight percent of participants strongly agreed that the workshop helped them express their emotions. Furthermore, 77.8% of participants strongly agreed that they felt better after the workshop and 85.5% strongly agreed that the instructor was approachable.

For future workshops, 92.6% of both children and adult participants agreed that they would refer a friend or family member to this workshop. In fact, 93.7% of all participants agreed that they themselves would take another workshop from the program.

In the 2011-2020 data, the most selected reason that the child participants took a workshop was *I like art* (62.36%) and for adults *Anxiety/Stress* (25.16%) and *Sadness* (23.09%) were the most selected.

Participants in 2018 rated the following items significantly lower than all other years: 1) *How Great the Workshop*, 2) *Emotional Expression*, 3) *Caring Instructor*, 4) *Instructor Time Management/Comfortable Sharing*, 5) *Effect of Workshop*, 6) *Willingness to refer a friend*, 7) *Interest in additional workshops*, and 8) *Overall Satisfaction*.

Participants in the Melting Colors workshop rated the following items significantly lower compared to other workshops: 1) *How Great the Workshop*, 2) *Emotional Expression*, 3) *Caring Instructor*, 4) *Instructor Time Management/Comfortable Sharing*, 5) *Effect of Workshop*, 6) *Willingness to refer a friend*, 7) *Interest in additional workshops*, and 8) *Overall Satisfaction*.

The workshops held Corbin Family Resource Center, Santa Ana (FaCT) were rated the lowest while the workshops held at Minnie St. were rated highest in the following areas: 1) *How Great the Workshop*, 2) *Emotional Expression*, 3) *Caring Instructor*, 4) *Instructor Time Management/Comfortable Sharing*, 5) *Effect of Workshop*, 6) *Willingness to refer a friend*, 7) *Interest in additional workshops*, and 8) *Overall Satisfaction*.

Overall, adult participants reported higher averages than child participants on all items. In fact, adult participants reported higher averages on 1) *This workshop was great*, 2) *This workshop helped me share my feelings/express my emotions*, 3) *The instructor was approachable and appeared to care about the participants*, 4) *The instructor was on time and valued my time*, 5) *I feel better after taking this workshop*, 6) *I would tell a friend or family member to attend this workshop*, 7) *I want to take another Art & Creativity for Healing workshop*, and 8) *Overall, I like this workshop/ I am satisfied with this Art & Creativity for Healing workshop*.

RESULTS

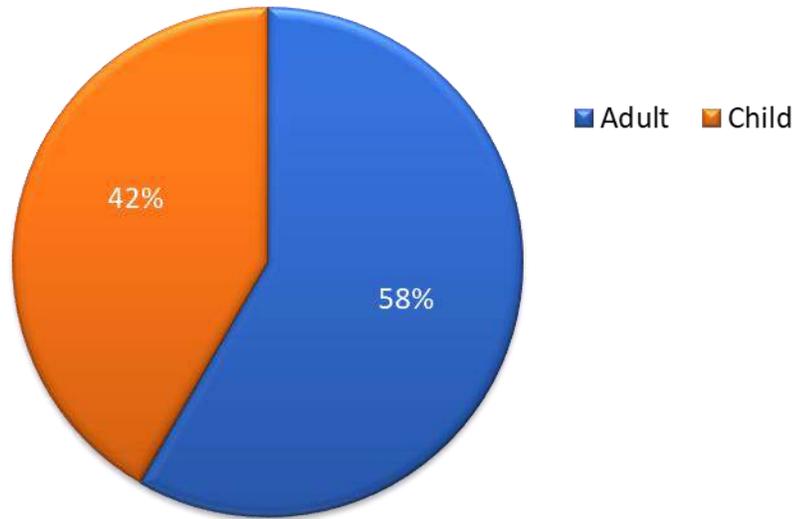

Overall Data Statistics

This data set consists of responses by 19,234 individuals who received ACFH services between the period of July 2009 and June 2020. Of those, participants either completed the adult survey (n=11,219) or the child survey (n=8,015). Generally, when working with statistical evaluation, we like to see a large sample. Data sets of this size (n=19,234) are generally regarded to be an accurate indicator of the measured items.

Frequency Tables

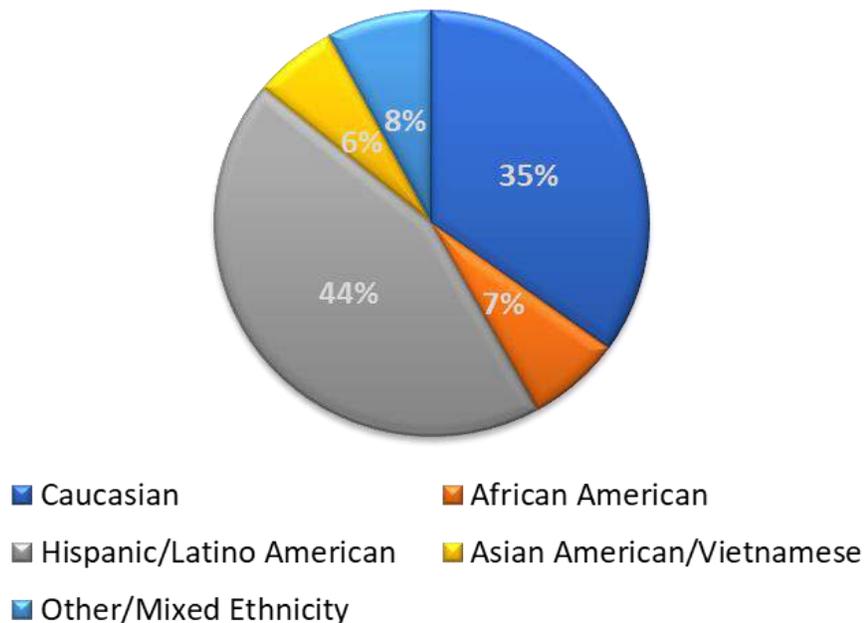

Fifty eight percent of participants completed the adult participant questionnaire. The remaining 42% were completed by children/teens. See figure 1. Approximately forty-two percent of the participants indicated their age (n=8147). The ages ranged from 4-94, with the average age being 28.83, for those participants who did include an age. It should be noted that less than 1 percent of the child questionnaire participants included their age thus skewing the data to be older than the average age could be.

Figure 1
ACFH Type of Client July 2009-March 2020

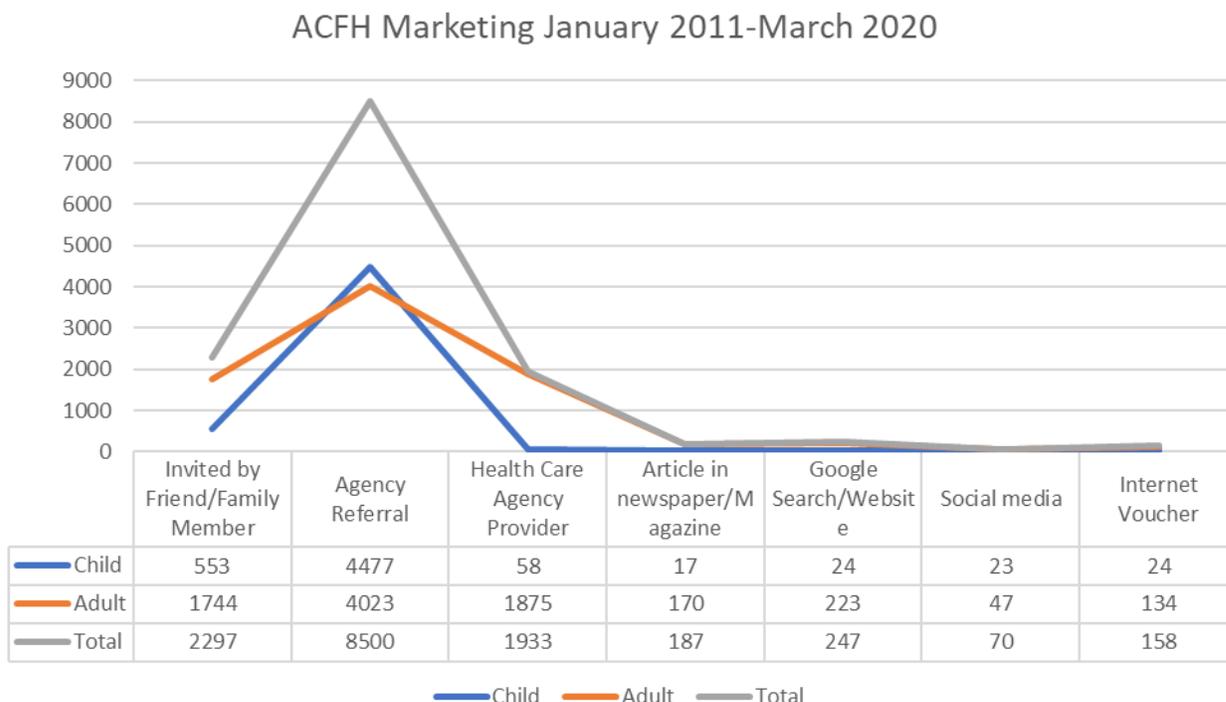

For those participants who indicated their ethnicity, Hispanic/Latino(a) American made up 44.3% followed by those identified as Caucasians made up 34.5%. See figure 2. Please note that the actual ethnicity included in the figures below is for those that reported their ethnicity and some individuals selected multiple ethnicities. Additionally, in January 2011 the survey coding was updated with new categories.

Figure 2
ACFH Ethnicities January 2011-March 2020

The majority of participants (63.5%) come to the program because they are referred by an agency. In January 2011 the intake form was updated with new marketing categories. See Figure 3.

Figure 3

When combining the locations for all programs, Orange County Department of Education/ACCESS (Raging Colors) had the largest percent of clients (17.9%). Next was at 15% for the various Homelessness Program sites (American Family Housing, Illumination Foundation, OC Rescue Mission, Someone Cares Soup Kitchen, Regina house, Hope Gardens, Project Hope). The majority of 2009-2020 clients participated in the *Expressing Feelings with Color* (69.9%) workshop followed by *Camp Pendleton Wounded Warriors* (14.6%). See appendix for the list of locations.

The participants generally have multiple psychological reasons for attending the workshops. Each participant was asked to indicate all the reasons and then select their top reason for taking the class. The most selected reasons that the child participants took workshops was *I like art* (62.36%) and for adults *Anxiety/Stress* (25.16%) and *Sadness* (23.09%) were the most selected for the 2011-2020 data. In January 2011, the questionnaire was updated with new categories. See figures 4 and 5.

ACFH Primary Reasons for Attending January 2011-March 2020

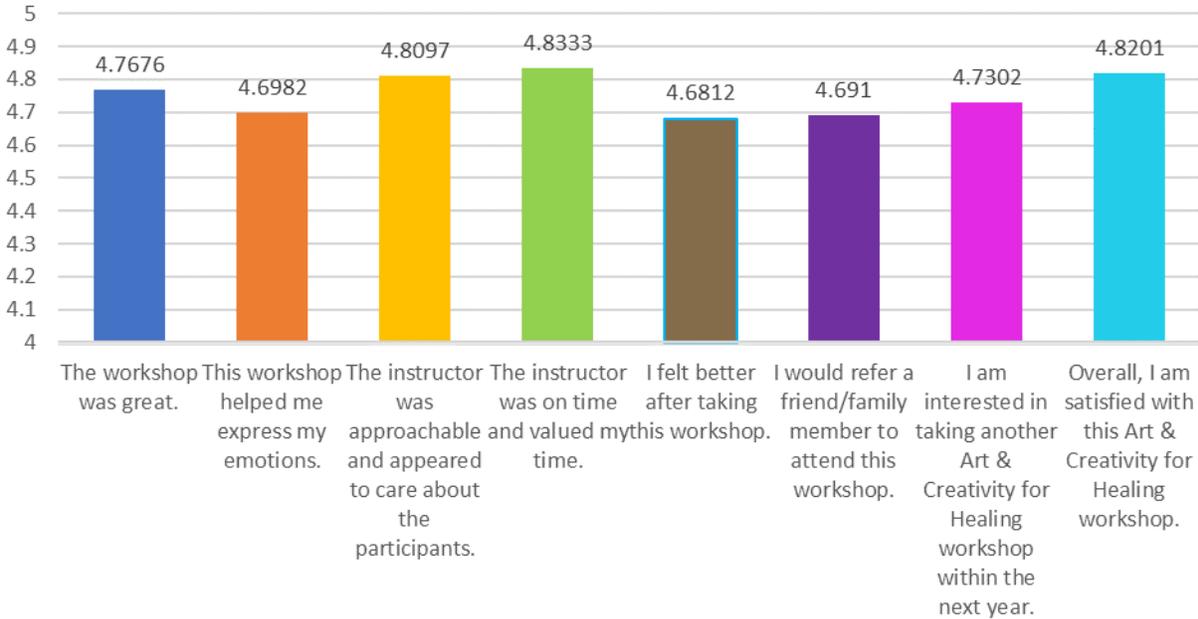

Since 2009, 81.5% of participants strongly agreed that the workshop was great. Seventy-eight percent of participants strongly agreed that the workshop helped them express their emotions. Furthermore, 77.8% of participants strongly agreed that they felt better after the workshop and

85.5% strongly agreed that the instructor was approachable. See Figure 6 for the program outcomes on all eight questions on the scale from 1-5 for the 2009-2020 participants.

Figure 6

ACFH Outcome Weighted Averages June 2009-July 2020

For future workshops, 92.6% of both children and adult participants agreed that they would refer a friend or family member to this workshop. In fact, 93.7% of all participants agreed that they themselves would take another workshop from the program.

Overall, it is significant to say that 96.8% of the 2009-2020 participants reported that they were satisfied with their workshop.

Participants Correlations

Correlation (Pearson *r*) tests were run for data from the eight questions answered on the participant survey with a rating. Correlations are useful in determining how closely one variable relates to another variable. Tests for the child participants were run comparing: 1) This workshop was great, 2) This workshop helped me share my feelings/express my emotions, 3) The instructor was approachable and appeared to care about the participants, 4) The instructor was on time and valued my time, 5) I feel better after taking this workshop, 6) I would tell a friend or family member to attend this workshop, 7) I want to take another Art & Creativity for Healing workshop, 8) Overall, I like this workshop/ I am satisfied with this Art & Creativity for Healing workshop.

In all eight rating variables listed above, there was a significant correlation for the participant’s data. This indicates that there is a strong correlation between each question and a reliable questionnaire measuring workshop outcomes. The strongest correlation was *Overall, I am satisfied with this Art & Creativity for Healing workshop* and *The Workshop was Great* ($r = .696$, $p < .01$) responses. See detailed information in the Appendix.

ANOVA's

One-way analysis of variance (ANOVA) tests were computed on five categorical variables and eight numerical values for all the 2011-2020 data participants. ANOVAs use statistics to compare categorical variables and numerical variables. The three categorical variables were: 1) Workshop Title, 2) Workshop Location, and 3) Ethnicity. The eight numerical values were rates of: 1) How Great the Workshop, 2) Emotional Expression, 3) Caring Instructor, 4) Instructor Time Management/Comfortable Sharing, 5) Effect of Workshop, 6) Willingness to refer a friend, 7) Interest in additional workshops, and 8) Overall Satisfaction.

When looking at the significance of ANOVA results, anything less than .05 is generally acceptable in research. A score at less than .05 indicates that the differences in the mean values between these groups, given the sample size, is so large that similarly strong findings would be unlikely to recur by chance, even if we were replicated this study a thousand times.

Categorical Variable: Year

There was a one-way analysis of variance (ANOVA) test computed for the categorical variable for the January 2009- June 2020 participant data for each year. There were eight differences reported between years and the 1-5 scaled outcomes (with 5 being the highest). The eight significant differences were 2018 year rated lower than the other years on 1) How Great the Workshop (2018 $M=4.71$; Yearly Average $M=4.76$, $p<.01$) 2) Emotional Expression (2018 $M=4.66$; Yearly Average $M=4.70$, $p<.01$), 3) Caring Instructor (2018 $M=4.70$; Yearly Average $M=4.81$, $p<.01$), 4) Instructor Time Management/Comfortable Sharing (2018 $M=4.79$; Yearly Average $M=4.83$, $p<.01$), 5) Effect of Workshop (2018 $M=4.64$; Yearly Average $M=4.68$, $p<.01$), 6) Willingness to refer a friend (2018 $M=4.62$; Yearly Average $M=4.69$, $p<.01$), 7) Interest in additional workshops (2018 $M=4.69$; Yearly Average $M=4.73$, $p<.01$), and 8) Overall Satisfaction (2018 $M=4.77$; Yearly Average $M=4.82$, $p<.01$).

Categorical Variable: Workshop Title

There was a one-way analysis of variance (ANOVA) test computed for the categorical variable of all workshop titles for the 2009-2020 participant data. The 35 workshop titles were 1) Expressing Feelings with Color 2) Bereavement Series 3) ACFH Studio Workshop 4) Camp Pendleton Wounded Warriors 5) Creative Tools for the Homeless 6) Out of the Darkness: Women Survivors 7) 4 week 2 8) Paint to feel, Paint to Heal; 9) Incredible Shrinking Machine; 10) What's Going On?; 11) Melting Colors; 12) Village of Hope; 13) Anger & Fear; 14) Painting Prayer; 15) Life's Up and Downs; 16) Love; 17) A Window to My Heart; 18) My Life; 19) The Language of Color; 20) Fear/Anger; 21) Disappointment & Loss; 22) Teen Anger, EFWC for Teens; 23) Compassion Fatigue; 24) Broken Promises; 25) Camp Pendleton Child Workshop; 26) Painting from the Soul; 27) Beginner Series - Art4Healing Certification Program; 28) 4-Week Anti-Bullying Series; 29) 4-week Beginning Creativity Series; 30) Autism Center; 31) Art of Surrender; 32) Disappointment and Loss; 33) Up in the Sky 1/8; 34) Friends; 35) Military Spouse Workshop.

Among all the eight numerical values there was a significant difference among the Melting Colors workshop compared to the others in: 1) How Great the Workshop (Melting Colors $M=4.16$; Total Average $M=4.76$, $p<.01$), 2) Emotional Expression (Melting Colors $M=4.33$; Total Average $M=4.69$, $p<.01$), 3) Caring Instructor (Melting Colors $M=4.16$; Total Average $M=$

4.81, $p < .01$), 4) Instructor Time Management/Comfortable Sharing (Melting Colors $M = 3.80$; Total Average $M = 4.83$, $p < .01$), 5) Effect of Workshop (Melting Colors $M = 3.66$; Total Average $M = 4.68$, $p < .01$), 6) Willingness to refer a friend (Melting Colors $M = 4.16$; Total Average $M = 4.68$, $p < .01$), 7) Interest in additional workshops (Melting Colors $M = 3.83$; Total Average $M = 4.73$, $p < .01$), and 8) Overall Satisfaction (Melting Colors $M = 4.0$; Total Average $M = 4.82$, $p < .01$).

Categorical Variable: Ethnicity

Due to multiple participants selecting more than one ethnicity a one-way analysis of variance (ANOVA) test could not be computed for the categorical variable client ethnicity for the 2011-2020 combined adult and child data. However, we are able to look at the reported ethnicities and compare the averages among the six types identified 1) Caucasian, 2) African American/Black, 3) Hispanic/Latinx American, 4) Asian American/Vietnamese, 5) Other (including bi-racial). The client indicated their ethnicity on their client survey. See Figure 7.

Figure 7

Independent Samples T-test

The Independent Samples T-Test compares the means of two independent groups in order to determine whether there is statistical evidence that the associated population means are significantly different. The two groups (child and adult) were compared among the eight outcome variables 1) How Great the Workshop, 2) Emotional Expression, 3) Caring Instructor, 4) Instructor Time Management/Comfortable Sharing, 5) Effect of Workshop, 6) Willingness to refer a friend, 7) Interest in additional workshops, and 8) Overall Satisfaction.

There were 8 significant differences among the child participants and adult participants. Adult participants reported higher averages on 1) This workshop was great ($t=10.23, p=.001$) 2) This workshop helped me share my feelings/express my emotions ($t=20.36, p=.000$), 3) The instructor was approachable and appeared to care about the participants ($t=26.056, p=.000$), 4) The instructor was on time and valued my time ($t=20.42, p=.000$), 5) I feel better after taking this workshop ($t=14.74, p=.000$), 6) I would tell a friend or family member to attend this workshop ($t=29.71, p=.000$), 7) I want to take another Art & Creativity for Healing workshop ($t=14.05, p=.000$), 8) Overall, I like this workshop/ I am satisfied with this Art & Creativity for Healing workshop ($t=15.20, p=.000$).

LIMITATIONS

While the data was evaluated by consultants independently from program management and staff, the program staff did collect all responses and enter the data into SurveyMonkey. Overall, this data evaluation has a respectable sample size and can generally be regarded to be an accurate indicator of the measured items.

It is important to emphasize that while correlations show the degree to which two numerical variables co-relate, they cannot measure other types of relationships. Because two variables are correlated does not necessarily mean that one variable causes the other to occur. The one significant correlation we did find was for the eight rating variables on the participant questionnaire which are all highly face valid.

ANOVAs can only be used when the groups are independent from each other. When completing a one-way ANOVA we are not able to see the possible interactions between the multiple numerical variable. Finally, we are not able to find the actual cause of the difference in means, only that there is a difference.
